Magic is a very confident and playful kitten, he is full of beans and an absolute joy to spend time with. He loves a cuddle but also very mischievous and takes great pleasure in running up to you and playing cheekily with your hands.

Magic has been socialised with a male adult cat but the cheeky monkey bopped the male on his head so it would seem he wants to be an only cat in the home, and having this little bundle of naughtiness in your home will be more than enough to keep you busy. Magic will settle into most homes straight away, like he has always been there.
